MARKETABLE PHOSPHATE ROCK IN JANUARY 1997

U.S. marketable phosphate rock production in January 1997 increased about 6% compared to the prior month, according to the U.S. Geological Survey (USGS). Annualized production for the month was calculated to be 45.0 million metric tons which was about 5% higher than the total production in 1996 of 43.8 million metric tons.

Domestic phosphate rock sold or used, excluding exports for January, decreased about 4% compared to the prior month, to 3.3 million tons. Annualized sales or use for the month was calculated to be 39.1 or about 7% less than the total for 1996 (Table 3).

U.S. producer ending stocks for January increased about 6% compared with December. In the Florida-North Carolina region, stocks were about 8% higher, while in the Idaho-Utah region, stocks were slightly lower compared with the previous month.

U.S. phosphate rock export volume reported to the USGS by domestic producers in January increased about 3% compared with December 1996 exports. Actual data are withheld from publication to avoid disclosing company proprietary data. Phosphate rock imports from Morocco are suppressed by the Bureau of the Census; total U.S. import tonnage was estimated by USGS to average 150,000 tons per month, or 1.8 million tons per year. January import data were not available at the time of publication.

Apparent domestic consumption for 1996, calculated from the sum of home deliveries and adjusted import data, was 42.7 million tons per year, compared with 42.6 million tons in 1995.

Table formats have been revised as compared to 1996 monthly reports, to reflect changes in the phosphate rock industry.

1/ Data may not add to totals shown because of independent rounding.

2/ Includes exports reported by producers.

3/ Calculated from nonannualized 1997 data, January through the most recent month of available reporting.

4/ Calculated as domestic sold or used plus imports, where imports are estimated to average about 150,000 tons per month, (and though the average monthly estimate may appreciably exceed any one month's reported imports).
